

## nationalgrid

**Organization Size:** 28,000 employees

**Vertical Industries:** Electric Power Distribution

**Country/Region:** United Kingdom

### Organization Profile

National Grid is one of the world's largest utilities focused on delivering energy safely, reliably, and efficiently.

### Business Situation

National Grid chose Microsoft SharePoint as its document management system and needed to manage emails along with other case related documents in SharePoint.

### Solution

National Grid chose Colligo Contributor Add-In for Outlook to make it easy for their legal staff to move emails from Outlook to SharePoint while automatically capturing email metadata.

### Benefits

- Improved email search and findability
- Centralized storage of emails and documents
- Increased adoption of SharePoint

### Software and Services

- Microsoft SharePoint
- Colligo Contributor Add-In for Outlook

## National Grid Legal Department Improves Collaboration and Increases SharePoint Adoption with Colligo Contributor Add-In for Outlook

“Colligo Contributor Add-In for Outlook has enabled the National Grid legal department to leverage the power of SharePoint in a way that is familiar and seamless to our users.”

Adam Davidson, Solicitor, Energy and Regulation at National Grid

National Grid is one of the world's largest utility companies, safely delivering energy around the world in a reliable and efficient system. To address the requirements of its legal department, National Grid chose SharePoint as its document management system, and, to address the specific need to manage emails along with other case-related documents in SharePoint, chose Colligo Contributor Add-In for Outlook. Colligo Contributor Add-In makes it easy for National Grid's legal staff to move emails from Outlook to SharePoint, while automatically capturing email metadata to organize and store case-related emails and documents. It also provides legal staff with offline access to SharePoint content when away from the office.

### About National Grid

National Grid is one of the largest investor-owned energy companies in the world. The company owns and operates gas and electricity transmission and gas distribution networks in the United Kingdom and the United States, as well as electricity distribution networks in the US. National Grid also has a number of related businesses such as Liquefied Natural Gas (LNG) importation and storage, land remediation, and metering.

### Application

National Grid's Legal Department lawyers, paralegal, and administrative staff use Colligo Contributor Add-In for Outlook to support the consolidation and sharing of case-related email and documents in SharePoint and for access to SharePoint content offline.

### Business Challenge

National Grid needed to upgrade and improve the document management system and processes of its legal department in order to improve team collaboration. Legal documents were being stored on a number of file servers and in personal folders on staff computers, which made sharing difficult, and affected the team's ability to find information. Email correspondence remained on individuals' computers and was not being stored with other case-related documents.

In order to standardize the company on a single platform, National Grid chose SharePoint as the basis of its document organization strategy. “We looked at other document management systems specifically designed for the legal industry, but found that SharePoint could provide most of the functionality we required and our IT department was keen on deploying SharePoint company-wide,” said Adam Davidson, Solicitor, Energy and Regulation at National Grid. “Therefore, we wanted to build a formal process around document management using SharePoint.”

“Since deploying Contributor, SharePoint adoption for document management has improved and the amount of content stored in SharePoint has increased.”

However, National Grid also needed the capability to manage emails with other case-related documents. This requirement called for a way to quickly move Outlook emails into SharePoint, and to easily capture email metadata in order to properly index and store the files.

### Solution: Colligo Contributor Add-In for Outlook

After being introduced to the Colligo Contributor Add-In and completing a successful pilot, National Grid deployed the solution to their legal department. The Colligo Contributor Add-In enables legal staff to easily drag-and-drop emails into SharePoint document libraries, while automatically capturing email properties and mapping them to metadata columns in SharePoint. Because Contributor handles all the data transfer and synchronization in the background, there is no waiting for the operation to complete before working on other tasks.

“Since deploying Contributor, we’ve found the adoption of SharePoint for document management has improved and the amount of content stored in SharePoint has increased,” said Davidson. “Case management has also improved because all legal matter, including email, is stored centrally in SharePoint. Before SharePoint and Contributor, staff had a lot of difficulty finding a document or email if the lawyer was away, and may have found it impossible if the email remained in the lawyer’s personal folders in Outlook. As everything is now properly tagged with metadata, staff can find what they need much more easily.”

Colligo Contributor’s additional benefit is its ability for users to synch SharePoint content to their laptops so that they can access it when they are away from the office and disconnected from the network. The fact that SharePoint is accessed through the same Outlook folder tree whether online or offline keeps it simple and lets users access their matter files or move emails to SharePoint using the same interface and processes. Any emails added to connected SharePoint folders or changes made to documents while offline are automatically synchronized to SharePoint when users connect to the network.

“Colligo Contributor Add-In for Outlook has enabled the National Grid legal department to leverage the power of SharePoint for document management in a way that is familiar and seamless to our users,” concluded Davidson.

### Results

The National Grid’s legal department has gained many benefits by deploying Colligo Contributor Add-In for Outlook:

- Improved case management through centralized storage and management of case-related emails and matter files
- Improved collaboration and knowledge sharing among legal staff
- Increased adoption of SharePoint within the legal department
- Offline access to SharePoint via the Outlook interface
