

Colligo Briefcase Enterprise

Secure access to SharePoint on the iPad

Easily store, view, sync, find, share, and edit SharePoint files, lists, images, documents and emails, including Outlook .msg files, on the iPad. Confidently support iPad usage, with enterprise-class security features that ensure the integrity of your corporate data.

Colligo Briefcase Enterprise works with every Colligo solution for desktops, laptops, and smartphones, providing unified, centrally-managed SharePoint access, online and off, on-premise or in the cloud.

“Colligo Briefcase is the ideal solution for keeping our iPad users productive, while ensuring critical content is still managed within SharePoint.”

– Bob Clark, Vice President of IT, Anthem Properties

View - Browse and find content, without requiring a web browser. Navigate SharePoint sites using the intuitive folder tree, for immediate access to lists, images, documents, and emails, directly from the preview pane.

Sync - Store SharePoint content offline for fast access, even when not on the network. Upload new or edited files/list items to SharePoint.

Find - Search synced SharePoint content for documents and other files. Favorites provide quick access to commonly-used folders and files.

Share - Email links to documents in SharePoint, reducing the need for attachments and promoting the use of SharePoint for document storage and collaboration. Or, send the full document to external recipients without SharePoint access (based on permissions).

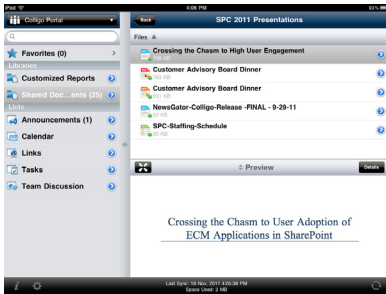

Edit - Edit lists and metadata, even while offline. Open and edit files in other applications, syncing changes back to SharePoint.

“We tested several iPad apps for SharePoint on their security features, and Colligo Briefcase was the hands-down winner.”

– Markus Bosch, Solution Architect, Novartis International

Enterprise Security

- Separate passcode to access the Colligo Briefcase application
- Hardware-based encryption (AES-256 bit) for all stored data
- Remote data wipe capabilities (via MDM systems)
- SharePoint credentials stored in Keychain, providing the highest form of trust-chain security
- Stored data can be wiped automatically on 10 failed login attempts
- Ability to restrict the SharePoint sites accessed and content cached (via Colligo Administrator)
- Ability to restrict which content can be shared with external recipients (via Colligo Administrator)
- Supports all SharePoint authentication methods as well as external access via VPN or Microsoft Forefront UAG/TMG

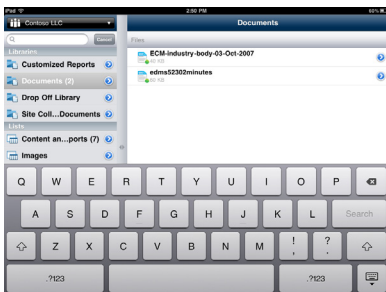

View

- View SharePoint site content without requiring a browser
- Preview files to quickly find the right document, then open for full-screen viewing
- Print wirelessly using AirPrint-enabled printers on any Wi-Fi network
- Use SharePoint views to selectively display visible content
- View standard and custom lists, including events, issues, links, contacts, announcements, tasks, and agendas
- View document properties, including any metadata supported by SharePoint
- Receive alerts when new items are added or favorites are updated

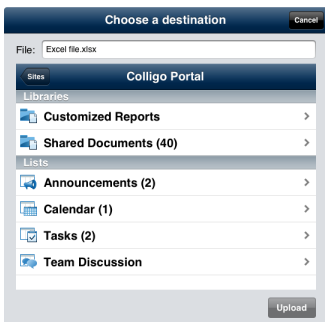

Sync

- Synchronize automatically or manually to ensure access to the latest content
- Select specific items, folders, libraries, or entire sites to synchronize
- Utilize SharePoint views to select specific content to sync within folders
- Granular control of sync interval - 15/30/60 min, daily, or on app open
- Limit application memory usage for offline storage on a per-site basis
- Sync on Wi-Fi and 3G, with option to disable 3G sync

Find & Share

- Search synced content for documents and other files
- Set up favorites for quick access commonly used folders and files
- Email documents as links to SharePoint, reducing attachment proliferation
- Copy links to be pasted into other documents or applications
- Email documents as full attachments to external recipients (requires explicit permissions)

Edit

- Edit documents using 3rd party applications such as Documents to Go or GoodReader
- Check in and check out files
- Conflict detection and resolution
- Edit metadata, including managed metadata and enterprise keywords
- Edit custom and standard lists
- Edit content while offline, sync changes when online
