

Colligo Briefcase for iOS

Secure mobile SharePoint access for iPad, iPhone, & iPod Touch

Unleash Your Mobile Workforce

Solve the mobility challenge with secure access to SharePoint, Office 365 and OneDrive for Business on iPad, iPhone, and iPod Touch devices. Embrace BYOD, while ensuring the security of your corporate data.

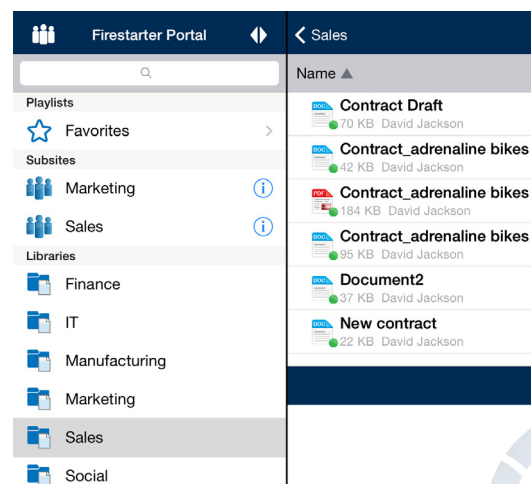

Ensure up-to-date SharePoint content is at your fingertips, wherever you are, on any device. Centrally deploy and manage SharePoint content on mobile devices, to support corporate governance, ensure compliance and reduce your risk.

NEW! Now includes PDF annotation tools and Citrix ShareFile QuickEdit app integration.

- As easy-to-use as consumer file-sharing applications, with all the security of SharePoint
- Access all your SharePoint files, from docs to images and email
- Store what you need offline, for easy access on the road
- Open & edit files on your laptop or mobile device, then sync your changes to SharePoint
- Full support for lists & metadata
- Available in English, German, French, Italian, Spanish, Simplified Chinese and Japanese
- Good Technology integration (optional)
- Supports SharePoint 2007/2010/2013, Office 365 and OneDrive For Business

View SharePoint files, including Office documents, PDFs, images and emails

- View SharePoint content without a browser
- Preview files to find the right document, fast
- Print over WiFi with any AirPrint or Cloud Print printer
- Use SharePoint views to choose visible content
- View standard and custom lists, including events, issues, links, contacts, announcements, tasks, and agendas
- View document properties, including all SharePoint-supported metadata
- Receive alerts when items are added or favorites are updated

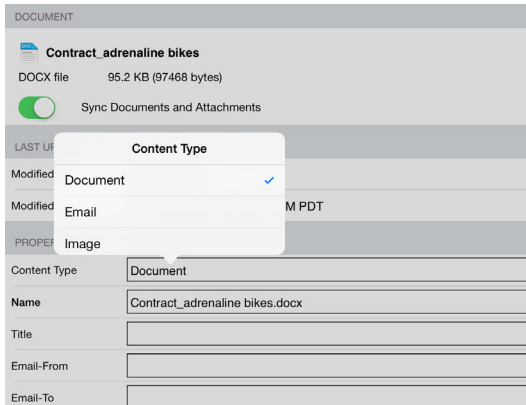

“We tested several iPad apps for SharePoint on their security features. Colligo Briefcase was the hands-down winner.”

Markus Bosch, Solutions Architect, Novartis International

Edit files, lists, and metadata, even while offline

- Check files in and out
- Open and edit in third-party applications
- Easily detect and resolve conflicts
- Edit metadata, including managed metadata and enterprise keywords
- Edit custom and standard lists
- Edit content offline, sync changes online

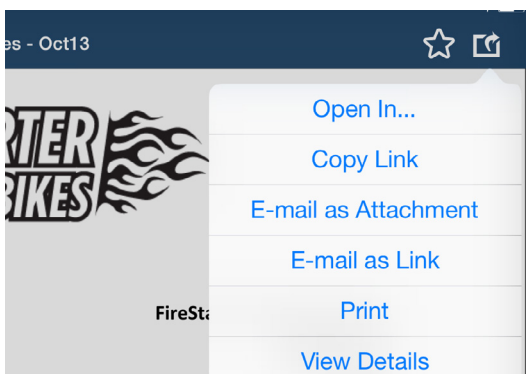

Sync what you need for easy access

- Sync automatically or manually for the latest content
- Select items, folders, libraries, or entire sites
- Use SharePoint views to choose content within folders
- Set your sync interval – 15/30/60 minutes, daily, or on app open
- Limit application memory usage for offline storage on a per-site basis
- Sync on Wi-Fi and 3G (option to disable 3G sync)
- Sync new or edited files back to SharePoint

Sync new or edited files to SharePoint

Easily share files using links to SharePoint documents

- Email documents as links to SharePoint, reducing attachment proliferation
- Promote the use of SharePoint for collaboration and storage
- Copy and paste links into other documents or apps
- Email documents as full attachments to external recipients (requires explicit permissions)

“Colligo Briefcase provides the most secure, robust and easy-to-use solution for accessing, syncing and viewing SharePoint content on an iPad.”

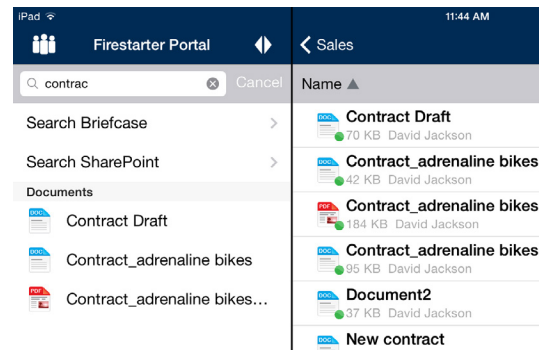

David Britton, Applications Manager, Global 100 Law Firm, Allens Arthur Robinson

Allens Arthur Robinson

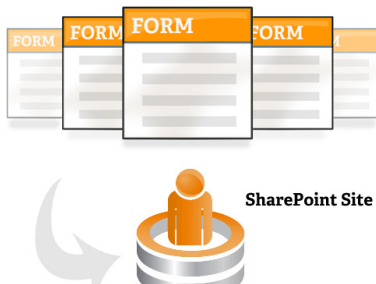

Find content fast with powerful search capabilities

- Search synced content for documents and other files
- Set up favorites for quick access to commonly-used folders and files

Collect and transmit data from the field, with advanced support for InfoPath forms

- Improve business efficiency by linking data entry to backend workflow, save time used to manually enter paper form data
- Fill in and submit InfoPath forms from your iPad
- Add hand-drawn signatures from your mobile device
- Upload corresponding photos
- Supports SharePoint form Libraries and Lists, with data automatically mapped to SharePoint metadata in Lists
- Supports InfoPath 2013, 2010, and 2007

Maintain business continuity and protect your investment

- Enterprise access to the support desk, including dedicated support team, case escalation and priority resolution
- Company-specific releases and updates
- Customization options including branding, feature-trimming, and other company-specific requirements

“Colligo Briefcase is the ideal solution for keeping our mobile users productive, while ensuring critical content is managed in SharePoint. The support for all major platforms – iOS, Windows, Mac– gives us even more flexibility in supporting BYOD.”

- Mike Wright, Business Systems Analyst, Northpower

Enterprise Security

Colligo Briefcase for iOS delivers the highest level of security to ensure that sensitive corporate data is encrypted, locked, and removable on demand.

Control access to SharePoint content

- Administrators can restrict access on a site-by-site basis
 - Sharing highly sensitive corporate documents can be restricted (via Colligo Administrator)
- Supports all SharePoint authentication methods

Protect your organization from the risk of lost or stolen devices

- Briefcase has its own passcode access on mobile devices
- After 10 failed logins, content is auto-wiped
- SharePoint content can be remotely wiped from the device using MDM
- Lost or stolen mobile devices can be wiped remotely
- Support for major MDM systems

Safeguard against malicious apps or people

- All stored data is encrypted with AES 256-bit hardware encryption
- iPad Keychain is used to protect users' SharePoint credentials
- Detects alteration of configuration p-list files and performs reset
- App data is not backed up to iTunes

Eliminate the threat of jailbroken devices

- Briefcase encrypts user credentials and passcodes
- Jail-broken devices are detected and blocked by your MDM solution

Prevent sensitive data from being shared externally

- Administrators can restrict users from emailing, printing and opening documents in other applications
- Email documents as links for extra security

Centralized configuration (optional) Increase IT efficiency and reduce costs with centralized administration through Colligo Administrator

- Centrally administer SharePoint sites, folders, favorites and libraries and lists.
- Support corporate governance initiatives with secure, centrally-enforced role- and policy-based SharePoint access
- Ensure appropriate access with configuration on a per-user or departmental basis
- Manage URLs in groups according to business or project needs

Good Technology integration (optional) Colligo Briefcase integrates with Good Dynamics to provide these additional capabilities:

- End-to-end data encryption between mobile device and server
- VPN-less, secure access to on-premise SharePoint
- Separate secure device storage for discrete wipe
- AES cypher technology protection
- Device data leakage protection
- Password policies enforcement
