Colligo Briefcase for Mac

The world's first SharePoint integration into the Finder

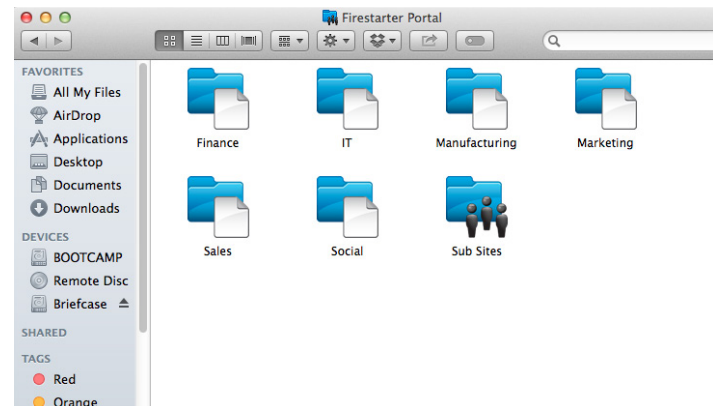

Mac Users Rejoice.

Colligo Briefcase for Mac provides the most optimal SharePoint user experience on Mac computers. No longer do Mac users have to suffer with second-rate access to SharePoint content. Briefcase offers deep SharePoint integration with Finder, the Mac file manager utility that's the equivalent of Explorer in Windows.

Briefcase for Mac delivers a productive desktop experience for both offline and online SharePoint content management. It enables users to easily sync, view, edit, file, tag, and share SharePoint documents with rich support for metadata – anytime, anywhere.

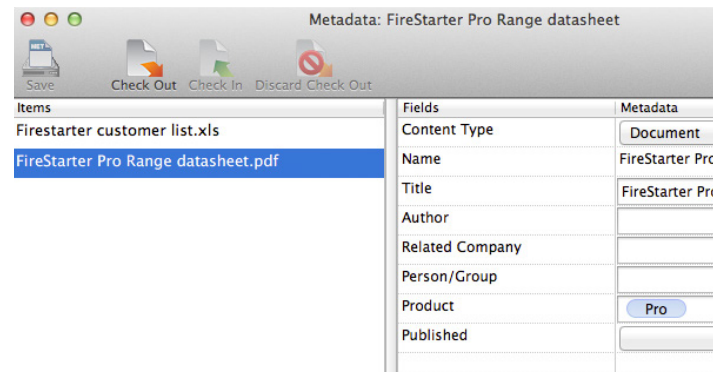

Enterprise-wide collaboration

- Achieve collaboration across the whole enterprise by bringing PC and Mac users together on SharePoint
- Increase SharePoint adoption and support of BYOD
- Streamline document management, from creation through revision and approval
- Increase remote worker productivity with offline view & edit capabilities
- Give users full access to SharePoint features: auto 2-way sync, document check-in/check-out, and conflict resolution

Intuitive, drag-and-drop user experience

- Drag and drop emails, documents and folders to SharePoint through the Finder
- Copy or email SharePoint document links with fast right-click
- Classify content with metadata for speedy searching
- Improve records management compliance

“Briefcase for Mac is downright simple and easy to use.”

- Jason Miller, Senior Consultant, Summit 7 Systems

Detailed Features

VIEW

- View content offline and remotely (e.g. on a laptop)
- View multiple SharePoint sites and site collections
- View SharePoint content without a browser
- View SharePoint libraries as folders in Finder
- View Outlook .msg files
- View document properties, including all SharePoint metadata

FILE

- Add documents to SharePoint libraries
- Copy files and folders between Mac and SharePoint
- Copy and move files and folders between SharePoint sites
- Allow users to open/save to SharePoint from any desktop application, not just Office applications
- Check-in/check-out documents via easy right-click access
- Get clear conflict resolution messages for file or metadata content changes and deletions

TAG

- Apply different metadata to individual files when filing a group of files
- Edit item properties with fast right-click access
- Use managed metadata (taxonomies and keywords) and person/group metadata

SYNC

- Set auto or manual 2-way sync to SharePoint (upload and download content from/to SharePoint)
- Keep SharePoint content offline for fast access, even when not connected to the network
- Enable versioning on file upload

SHARE

- Copy SharePoint document URL's with fast right-click access

AUTHENTICATION

- Windows authentication
- Claims-based authentication
- Form-based authentication (FBA)
- ADFS
