

Colligo Contributor 4.3 SP6

Release Notes

TECHNICAL REQUIREMENTS

Software Requirements

Colligo Contributor requires one of the following operating systems:

- Windows XP Professional
- Windows Vista
- Windows 7

Client Software Requirements

Colligo Contributor has the following client software requirements:

- Microsoft .NET framework 3.5 Runtime
- Integration with Microsoft Office requires Office 2003 or later
- Microsoft Office 2003 SP2, 2007 or 2010 required if you wish to make use of InfoPath forms libraries
- Microsoft Office Primary Interop Assemblies (PIAs). Different versions of Office have different PIAs. PIA's must be deployed corresponding with the version of Office installed
- Microsoft Visual Studio 2005 Tools for Office Second Edition (VSTO 2005 SE) Runtime
- Microsoft Visual C++ 2008 SP1 Redistributable Package

Server Software Requirements

Colligo Contributor requires at least one of the following:

- Microsoft SharePoint Server 2010, MOSS 2007, or SharePoint Portal Server (SPS) 2003
- SharePoint Foundation Microsoft Windows SharePoint Services (WSS) 3.0, or 2.0.
- SharePoint 2010 Online (Office365) or BPOS

Hardware Requirements:

Colligo Contributor has the following hardware requirements:

- Windows-based PC (with Pentium II 450 MHz minimum, 20MB of free disk space, 64MB RAM)

RESOLVED ISSUES

Release 4.3 SP6 (build 4.3.151)	
Issue #	Description
2502	Importing sites using the .xml file in the Sites folder, or using Colligo Administrator, is now supported by 64-bit Office 2010.
3044	After syncing a list and filtering it to display only one of multiple subfolders, the full list of subfolders now displays when setting a new filter.
3074	The MSI property, ADMIN_SITE_URL now propagates to the Contributor installation.
3085	The default email address extraction when uploading an email message is now the SMTP address format: e.g. <u>myname@mycompany.com</u> , rather than a mail-system-specific address with type fields identifying the address format. If you prefer to have the mail-system-specific address as before, you can use the MSI property EXTRACT_SMTP_EMAIL_ADDRESSES_ONLY or the registry key ExtractSmtpEmailAddressesOnly with the value of "0" to revert to the prior behavior.
3115	The Contributor Pro 4.3 SP5 release included a bug that resulted in a sync error (ArgumentException: Item has already been added) in some sync scenarios. This has been fixed.
3117	If a script is used to create Managed Metadata fields in SharePoint without the Required property being specified, Contributor now correctly interprets the field.

NEW FEATURES

Release 4.3 SP5	
2655	Colligo Contributor is now supported by Colligo Administrator, which allows for central administration of users' SharePoint sites, folders, and favorites.

RESOLVED ISSUES

Release 4.3 SP5	
Issue #	Description
2706	The status dialog layout has been fixed to correctly display status information when synchronizing large lists.

RESOLVED ISSUES

Release 4.3 SP4	
Issue #	Description
941	Uploading a zip file with Colligo File Manager without a zip program installed no longer results in multiple instances of Windows Explorer being launched.
2329	When initially launching Colligo Contributor Add-In for Outlook, if the Activation window is left idle, multiple activation windows are no longer generated.
2595	The send-and-file function in Colligo Contributor Add-In for Outlook now allows filing to non-cached locations.
2495	Clicking the Connect to Outlook button in Internet Explorer no longer leaves behind an additional active Contributor process after the task is completed.

RESOLVED ISSUES

Release 4.3 SP3	
Issue #	Description
1898	Colligo Contributor Add-In for Outlook now processes any available CfsSites.xml files on start-up. You no longer need to run Colligo Contributor Client just to handle this task.
2236	Users can now use the Edit Response Before Sending option when responding to a meeting request in Outlook and the request is sent and recorded successfully.
2454	In Colligo Contributor Client, views that are filtered by managed metadata columns now display correctly.
2495	Users can now drag-and-drop emails from Outlook into a subfolder of a library in Colligo Contributor Client.
2178	XML-based Office files now support Enterprise Keywords.

RESOLVED ISSUES

Release 4.3 SP2	
Issue #	Description
2301	When users save a document with the Save As function, the Colligo File Manager locations now display as save options.

NEW FEATURES

Release 4.3 SP1	
510	Compatible with 64-bit edition of Microsoft Office 2010

KNOWN ISSUES

Release 4.3 SP1	
Issue #	Description
2135	When installing Colligo Contributor, users with a 64-bit Operating System and 32-bit Microsoft Office need to manually download the x64 C++ redistributable package.
2169	<p>Users with Outlook 2003 who are using Microsoft Word as their default email editor, will experience abnormal behavior when using Colligo Attachment Manager.</p> <p>For normal functionality, configure Outlook as follows:</p> <ol style="list-style-type: none"> 1. From the Tools menu, select Options. 2. Click the Mail Format tab. 3. In the Message format group, uncheck the following two boxes: <ol style="list-style-type: none"> a. Use Microsoft Office Word 2003 to edit e-mail messages b. Use Microsoft Office Word 2003 to read Rich Text e-mail messages 4. Click Apply.

RESOLVED ISSUES

Release 4.3 SP1	
Issue #	Description
1679	In Microsoft Word 2003, the Send & File and Settings buttons no longer appear within the toolbar.
1696	When Outlook is closed and you choose File > Send (Email) in Microsoft Word, a dialog displaying an unspecified MAPI error no longer displays.
2128	If you change the default behavior for the Send & File setting, then close and restart Outlook, the change in setting is now retained.
2243	With Contributor Uploader, Send & File does not cause the Edit Properties dialog to appear and the email is not filed to SharePoint.
