NOTE: All devices require IOS6 or higher
- iPad (2nd generation and above) and iPad Mini
- iPhone (3GS and above)
- iPod Touch (4th generation)

SharePoint Platforms Supported

- SharePoint 2013
- SharePoint 2010
- SharePoint Online (Office 365)
- SharePoint 2007

Resolved Issues

Release 3.5.2 – September 19, 2013	
Reference #	**Description**
1329	Files that should have displayed in a subfolder sometimes displayed at the root level. This has been resolved.
1563	Sometimes when subsites were deleted in SharePoint, they were not deleted in Briefcase. This has been resolved.
1627	In Briefcase Enterprise, files and folders occasionally did not display. This has been resolved.
1636	If users added an attachment to an item that created a merge conflict, the content was not updated in SharePoint and the attachment had to be deleted. This has been resolved.
1638	On the iPhone, if a user rotated the display when a sketch was displayed, the aspect ratio changed and the user had to tap the sketch to correct it. This has been resolved.
1639	If a user rotated the **Choose a Destination** View screen when uploading an image, the header for the folder hierarchy did not switch to the correct height. This has been resolved.
1649	On the iPhone, the **Passcode** screen had a blank space at the bottom of it. This has been resolved.
1664	The **Global Storage Limit** setting in the **Colligo Briefcase Settings** screen was not being applied successfully. This has been resolved.
1679	The **Open In Approved Apps** feature from Colligo Administrator was not being successfully applied. This has been resolved.
1716	When using the search term field, the keyboard did not disappear when users selected anything outside the field. This has been resolved.
1773	If a URL was entered with spaces, the URL validation feature did not work. This has been resolved.
1822	If users navigated to a folder, then to grid view and then back to the library, the display reverted back to the normal view. This has been resolved.
1828	If users tapped the **Done** button multiple times when uploading a sketch, multiple occurrences of the same dialog displayed. This has been resolved.
1832	When using Colligo Administrator, if the **One Way Sync** configuration item is set to True, the Views button disappears. This has been resolved.
1846	When adding a site, the default http:// was not deletable, creating a problem when copy/pasting URLs into the field. This has been resolved.
1858	The **Alert on Playlist update** feature was not being applied correctly. This has been resolved.
1860	XML files were not loading. This has been resolved.
1870	If a Briefcase Enterprise build contains a hard-coded Colligo Administrator URL, the corresponding field cannot be disabled by a user.

55434722	Briefcase iOS now supports iOS 7.
56399820	This release includes a new diagnostic setting to fully revalidate sites on each sync, instead of incrementally synchronizing new changes.

New Features

Release 3.5 – July 24, 2013	
Reference #	**Description**
1577	Briefcase now requires iOS 6 and higher.
1580	When viewing an item in a library, the Preview pane is now open by default.
1581	After adding a site, the sync activity pop-up no longer displays by default. You need to tap the sync icon to view the sync progress.
1582	When viewing an item in a playlist or in the search results, you can now tap a button to display the item in full screen.
1583	When you enter a URL in the **Add Site** dialog, Briefcase checks to see if the URL is valid. If the URL is invalid, the site cannot be added.
1584	After you enter a URL in the **Add Site** dialog, Briefcase checks if the URL needs a Domain as part of its authentication credentials.
1585	When adding a site, the sync interval, storage limit, and the ability to hide disabled lists are grouped under the Advanced Settings in the **Add Site** dialog.
1586	If you have added a site but have not synced your lists and libraries, this can now be done in the new **Advanced Settings** section.
1587	A new setting, **Sync default lists**, means that when this setting is enabled, default lists are automatically synced; you do not choose which lists/libraries are synchronized when you first add a site.
1588	The bracketed number that previously displayed beside each list/library has been removed.
1589	You can now choose to hide or display lists/libraries that are not synced.
1590	After a site is synced, you can choose to sync specific views for each list/library.
1591	Minor UI improvements have been made.
1592	If you enter characters into the search field, Briefcase filters the top-level content and displays the top three results.
1593	Search results now display in the same manner as playlists; you can select an item in the results and it displays in the right side of the screen.
1603	Briefcase is now available in French, German, Spanish, Italian, Japanese, and Chinese.
1606	Briefcase now supports Contacts lists. You can tap on a contact's mailing address, email address, or phone number to launch an associated app to view their geographic location, to send an email, or to call or FaceTime the contact.
1625	When choosing which lists/libraries to sync, you can now choose to select or deselect all.

Resolved Issues

Issue #	Description
1669	When using Colligo Administrator, the **Sync on 3G** setting was not functioning properly. This has been resolved.
1682	On the iPad mini, when you were adding a site, when you selected the Domain field the keyboard obscured the field. This has been resolved.
1690	If you attempted to change a passcode in global settings while in landscape view, the bottom half of the **Change Passcode** dialog was cut off. This has been resolved.
1692	On the iPad mini, when adding a site, the keyboard obscured the credential fields. This has been resolved.
1734	On the iPhone, if you tapped the arrow beside a list or library to go into the settings screen and tapped the action item menu, there was no **Cancel** button in the options presented. This has been resolved.

Known Issues

Issue #	Description
1767	On the iPhone 4, if you start a sync, then lock and unlock the phone during the sync, the app will crash or sometimes hang. The sync is cancelled and has to be restarted. If you don't unlock the phone before the sync is complete, the app functions normally. *NOTE*: this known issue applies only to the iPhone 4.

Resolved Issues

Release 3.4.6 – April 24, 2013	
Reference #	**Description**
1506	Selecting Email as Link for a list item attachment no longer causes Briefcase to crash.
1550	Previously, if a user selected Global Settings on the app's first launch with no sites in the site list, Briefcase would freeze. This has been resolved.
1552	An Automatic Web Login setting has been added for sites that fail on automatic web login.
1558	If a user adds a new single choice or Boolean values to multiple list items in grid view, the newly populated fields are now pushed successfully to SharePoint on the next sync.
1564	The Email as Attachment now works properly for list item attachments.
1569	Colligo Administrator now supports groups in the Applicability field when pushing configuration settings to Briefcase.

New Features

Release 3.4.5 – March 18, 2013	
Reference #	**Description**
1529	Briefcase now includes an option to set a logging level and an option to email the log file.
1531	IT Managers can now push Office 365 sites to Briefcase users in conjunction with Colligo Administrator.

Resolved Issues

Issue #	Description
1435	Previously, if a site was added, deleted, and re-added, the site's metadata and files were downloaded but the content did not display when selected. This has been resolved.
1518	If Briefcase was set to sync every 15 minutes, sometimes the sync failed. This has been resolved. Multiple sites will now be queued to be synced every 15 minutes.
1522	Some videos were not displaying in full-screen mode. This has been resolved.
1526	IT administrators were unable to set the default sync interval as **Every Open** through Colligo Administrator. This setting is now supported.
1527	If the Preview pane was open, users could not view search results. This has been resolved.
1528	If a Colligo Administrator configuration setting was global but had a Configuration Site Reference, it was not read correctly in Briefcase. This has been resolved.
1533	Users were unable to upload an image as an item attachment while offline. This has been resolved.
1541	If a user rotated the screen when playing a video in full-screen, the video did not rotate to match the screen orientation. This has been resolved.
1542	If a user played a video in full-screen mode, the video couldn't be played again after exiting full-screen mode unless the video is re-selected. This has been resolved.
1543	If a user played a full-screen video on an iPhone 5, the display is black with a title bar at the top of the screen. This has been resolved.
1546	Previously, if a user attempted to upload 2 attachments while offline, the first attachment was successful but the second attachment failed. This has been resolved.

New Features

Release 3.4 – February 1, 2013	
Reference #	**Description**
957	Users now have the ability to approve or reject items if the SharePoint library supports that functionality.
1246	Users now have the option to sync a read-only sample site when first launching Briefcase to access typical site content.

Resolved Issues

Issue #	Description
774	If there was a conflict around a file's title that a user had resolved, if a file with the same name was uploaded, Briefcase would crash. This has been resolved.
1374	In version 3.3.2, when a user was attempting to view/preview a .doc file, occasionally a Loading indicator was displayed indefinitely. This has been resolved.
1469	On occasions there were files that did not appear in Briefcase after an initial sync. This has been resolved.

New Features

Release 3.3.7 – January 22, 2013	
Reference #	**Description**
1340	Briefcase Enterprise now supports single sign-on for sites added from Colligo Administrator.
1371	Briefcase Enterprise now supports custom folder icons through Colligo Administrator. Image files must be added to the Colligo Administrator folder and will display in place of the default icon in Briefcase.

Resolved Issues

Issue #	Description
1329	Previous issues with files incorrectly appearing in the root folder after move have now been resolved.

New Features

Release 3.3.5 – December 7, 2012	
Reference #	**Description**
1373	Briefcase now has a setting for Web Login NTML Detection.
1373	Briefcase now has a new site setting to manually reset authentication cookies.
1381	Briefcase now supports ISA Web Publishing Load Balancers.

Resolved Issues

Issue #	Description
1379	Previous issues with web logins have now been resolved.

New Features

Release 3.3.3 – November 27, 2012	
Reference #	**Description**
1340	Briefcase now supports Single Sign On (SSO) and auto sign-on for Office 365 sites.

Resolved Issues

Issue #	Description
930	In Date and Date Time metadata fields, the pickers are now automatically set to the current day when first selected and the option to clear the field is now present.
1277	Briefcase now supports TLS v1.0.
1319	The action that generated the error message "request failed because it redirected too many times" when logging into a SharePoint site, has been fixed.
1329	Previously, files that should have appeared in subfolders were appearing at the root folder level. These files are now appearing in the correct location.
1339	Previously, editing a calendar item caused a crash. This has now been fixed.
1345	When a list is grouped by approval, the items are now grouped by Approved, Pending, and Rejected, instead of 0, 1, and 2.
1346	Users can now successfully upload a SharePoint 2013 file to Briefcase.

New Features

Release 3.3.2 – October 10, 2012	
Reference #	**Description**
620	Calendar lists now display graphically as in SharePoint, with day, week, and month views.
857	Users can now apply one or more filters to SharePoint columns to narrow the scope of the data they are viewing.
1148	Users can now create "Playlists," which allow multiple personal lists of favorite SharePoint items.
1209	When uploading items to Briefcase, a properties screen displays, giving the user the opportunity to enter any relevant metadata for the item, and to choose a content type for the item. Multiple content types per list are now supported.
1210	Using Colligo Administrator, you can now restrict the apps that Briefcase items will Open In (Enterprise version only). If users choose an app that is not on the list of allowable apps, they will receive an error message.
1211	Users can now perform a search of either the local cache in Briefcase, or an online search of the entire SharePoint site.
1297	When uploading a sketch file, the default file name is Sketch.jpg. If this file name already exists, a number is now appended to the name.
1300	Users can now view content directly in SharePoint via an online browser that opens within Briefcase.

Resolved Issues

Issue #	Description
832	Users are now able to see the choices/values in a lookup list that are located in a different SharePoint site.
1110	When a file or a file's metadata is modified but not uploaded, the file now appears in a state that indicates this (yellow sync icon).
1232	The default view is now set correctly when viewing a list/library.
1234	Multi-line Rich Text fields formatting is now viewable.
1230	A progress indicator now displays when data migration is occurring.
1254	When creating a new list item, a yes/no metadata field is now editable.
1282	Users no longer have to exit the calendar view to update the calendar. In addition, the number that indicates how many events are in the calendar now updates correctly.

New Features

Release 3.0.1 – July 18, 2012	
Reference #	**Description**
577	Breadcrumbs have been added for navigational purposes.
587	Users can now upload photos from the iPad camera or from the photo library, as well as free form sketches, to a SharePoint location.
705	Inter-document linking in PDFs is now supported.
815	The list order of views as defined in SharePoint is now honored in the Briefcase views.
818	Search result items now display the full path of the item's location in SharePoint.
826	InfoPath forms are now supported. Users can view, edit, and create new InfoPath forms. Online connectivity is required for full form access. When offline, users can enter metadata for InfoPath form list items and the item is uploaded on the next sync.
835	Check-out/Check-in now occurs when the button is pressed rather than on a sync.
837	When a check-out error occurs, Briefcase displays an error and prevents any data loss
1000	Briefcase is now supported on iPhone and iPod Touch.
1075	Subsites are now visible in the same pane as lists and libraries.

Resolved Issues

Issue #	Description
612	Briefcase no longer attempts to sync sites that a user doesn't have access to.
831	Check in/out now functions properly for SP 2007 sites
859	Forms-based authentication no longer fails in certain situations.
1103	Users can now sync to SharePoint Foundation sites on all Briefcase versions.

New Features

Release 2.0.40 – May 1, 2012	
Reference #	**Description**
301	Additional Flurry Analytics have been added.
467	Users can now download documents from Briefcase to an editor app, make changes to the document, and then upload it to SharePoint using Briefcase. The **Choose a destination** dialog lets users save the document in any location in any connected site.
467	Users can now delete items in either lists or libraries.
489	Users can now edit metadata in documents and list items.
490	Users can now create new list items.
492	Users can now delete attachments in list items.
493	Users can now check items in document libraries in or out.
678	A required email address for Enterprise Activation has been added.
804	Views based on multiple value metadata type columns now display and sync correctl.
824	New sync limits have been added: 8GB, 16GB.

Resolved Issues

Issue #	Description
589	The Briefcase trial version now supports UAG authentication.
831	Check In/Out in SharePoint 2007 sites is now supported.
859	Forms based authentication no longer fails.
929	Briefcase no longer crashes when pressing the **Cancel All** button during a sync.
