White Labeling

Colligo Briefcase includes the ability for customers to replace any instances of Colligo branding with their own company name and information. This document describes the fields and locations in Colligo Briefcase where you can modify that information, and provides a script with the keys that you can add to your registry.

Registry Path and License Key

All registry keys for Colligo Briefcase are located at the following file path: <u>HKEY_LOCAL_MACHINE\SOFTWARE\Colligo\Contributor\Branding</u>.

Enabling Branding

To enable branding, you need a branding-enabled license key, which you can purchase from Colligo.

You have two options to modify the branding locations in the product:

- Add the branding settings to the MSI file and deploy the file to all users: see Using the MSI
- Update your users' registries with the branding registry keys: see Using Registry Settings

Disabling Branding

To disable branding you can install a license key that doesn't include branding capability, or you can set the registry key **EnableBranding** to **0**. However, there are 4 properties that you cannot set in the registry, so those properties would not change.

Using the MSI

To update the MSI file:

- 1. Download and install Orca, a Microsoft MSI editor, from the following location: http://support.colligo.com/Lists/Knowledge%20Base/DispForm.aspx?ID=4
- 2. Open the MSI file in Orca.
- 3. Navigate to the **Property** table in the **Tables** list.

🕿 ColligoEmailManager_x86.msi - Orca

RadioButton RegLocator Registry	VSDINVALIDURLMSG VSDVERSIONMSG MaintenanceForm_Action	The specified path '[2]' is unavailable. The Intern Unable to install because a newer version of this Repair				
RemoveFile RemoveIniFile RemoveRegistry	ErrorDialog SFF_UpFldrBtn SFF_NewFldrBtn	ErrorDialog UpFldrBtn NewFldrBtn				
Tables: 88	Property - 35 rows	No column is selected.				

4. From the **Tables** menu, select **Add Row**. The **Add Row** dialog displays:

A	dd Row			Name of Street	×
	Name	Value			
	Property				
	Value				
Ľ	<u>.</u>				
	Property - :	String[72], Required			
				1	
L		ОК	Cancel		
L					

- 5. Enter the **Property** name and **Value**.
- 6. Click **OK**.
 - The new property displays in the Property Table.
- 7. Using this approach, add all the relevant properties listed in **Branding Properties and Locations**.

Using Registry Settings

The following text is the registry script for the branding locations.

```
[HKEY_CURRENT_USER\Software\Colligo\Contributor\Branding]
"EnableBranding"="1"
;Generic needed branding property
[HKEY_CURRENT_USER\Software\Colligo\Contributor\Branding]
"AboutScreenFileName"="About.png"
"AboutScreenInfoLocation"="300,30"
"SplashScreenFileName"="SplashScreen.png"
"SplashScreenInfoLocation"="330,250"
"SystemTrayAppName"="Colligo Branding App Name"
```

These keys are not present by default in the registry. To add them:

- 1. Copy and paste the script into Notepad.
- 2. Save the file as **.reg**.
- 3. Double-click the file to open it and add to the registry.
- 4. Enter your company name or the preferred wording in the second half of each key.

NOTE: The following 4 properties can only be modified in the MSI file:

- CONTRIBUTOR_SHORTCUT_NAME
- START_MENU_FOLDER
- FILE_MANAGER_FOLDER_NAME

Branding Properties and Locations

The following table describes the property names and registry keys for the different instances of branding throughout Briefcase.

MSI Property Name	Registry Key	Default Value	Format
FILE_MANAGER_FOLDER_NAME	n/a	(empty)	Text
START_MENU_FOLDER	n/a	(empty)	Text
CONTRIBUTOR_SHORTCUT_NAME	n/a	(empty)	Text
ENABLE_BRANDING	Software\Colligo\Contributor\Branding \EnableBranding	"1" = enabled	0 or 1
ABOUT_SCREEN_FILENAME	Software\Colligo\Contributor\Branding \AboutScreenFileName	(empty)	Text
ABOUT_SCREEN_INFO_LOCATION	Software\Colligo\Contributor\Branding \AboutScreenInfoLocation	(empty)	x-pixel,y- pixel ("100,200 ")
SPLASH_SCREEN_FILENAME	Software\Colligo\Contributor\Branding \SplashScreenFileName	(empty)	Text
SPLASH_SCREEN_INFO_LOCATION	Software\Colligo\Contributor\Branding \SplashScreenInfoLocation	(empty)	x-pixel,y- pixel ("100,200 ")
SYSTEM_TRAY_APP_NAME	Software\Colligo\Contributor\Branding \SystemTrayAppName	(empty)	Text

Start Menu

The following MSI properties display in the following locations:

- CONTRIBUTOR_SHORTCUT_NAME
- START_MENU_FOLDER

System Tray

The registry key *SystemTrayAppName* displays in the following locations:

File Manager Root Folder

The MSI property FILE_MANAGER_FOLDER_NAME displays in the following location:

About Screen and Splash Screen Images and Locations

The *AboutScreenFileName* and *SplashScreenFileName* registry settings point to a new About or Splash screen image. You can give the image names absolute paths, or by default, Briefcase looks for the images in one of the following locations:

- %LOCALAPPDATA%\ColligoOfflineClient\Config\Branding
- %APPDATA%\ColligoOfflineClient\Config\Branding
- %ALLUSERSPROFILE%\ColligoOfflineClient\Config\Branding

The *AboutScreenInfoLocation* and *SplashScreenInfoLocation* registry settings refer to the location of the version and build number on the About and Splash Screens.

About Screen Image

The registry keys *AboutScreenFileName* and *AboutScreenInfoLocation* display in the following locations:

Splash Screen Image

The registry keys *SplashScreenLocation* and *SplashScreenInfoLocation* display when you first launch Briefcase.
