

Contributor Pro 6.0 SP3

Release Notes

Contributor Pro System Requirements

Operating System

Contributor Pro runs on the following versions of Windows:

- Windows 8
- Windows 7
- Windows XP Professional
- Windows Vista

Software Requirements

Contributor Pro is compatible with the following software:

- Microsoft Office 2007, 2010 SP1, or 2013 (32-bit or 64-bit edition)
- Internet Explorer 7 or higher (optional)
- Windows 2008R2 Server (for Terminal Services)

Contributor Pro also requires the following supporting software on the client machine:

- Microsoft .NET framework 3.5 Runtime
 - <http://www.microsoft.com/en-us/download/details.aspx?id=21>
- Microsoft .NET framework 4.0 Runtime
 - <http://www.microsoft.com/download/en/details.aspx?id=17718>
- Microsoft Visual C++ 2010 Redistributable Package
 - 32-bit Operating System: <http://www.microsoft.com/download/en/details.aspx?id=5555>
 - 64-bit Operating System: <http://www.microsoft.com/download/en/details.aspx?id=14632>
- Visual Studio Tools for Office (VSTO) 2005 SE
 - <http://www.microsoft.com/en-ca/download/details.aspx?id=24263>
- Visual Studio Tools for Office (VSTO) 2010
 - <http://www.microsoft.com/en-us/download/details.aspx?id=35594>
- Microsoft Office PIAs
 - Office 2013: check with Microsoft for Office 2013 PIA availability
 - Office 2010: <http://www.microsoft.com/download/en/details.aspx?id=3508>
 - Office 2007: <http://www.microsoft.com/download/en/details.aspx?id=18346>
- Windows Identity Foundation: <http://www.microsoft.com/en-ca/download/details.aspx?id=17331>
NOTE: Windows Identity Foundation (WIF) is not supported in Windows XP, so it is not necessary to install it if you are using XP. For Windows Vista/ 7/8, WIF is required to handle Colligo Administrator authentication through ADFS.

Server Software Requirements

Contributor Pro supports connectivity with any of the following editions of SharePoint:

- Microsoft SharePoint Server 2010 or 2013
- Microsoft SharePoint Server 2007 (not supported by Email Manager Connected Mode)
- Microsoft SharePoint Foundation 2010 or 2013
- SharePoint 2013/2010 Online (Office 365)
- (Optional) Microsoft FAST Search Server 2010 for SharePoint

Hardware Requirements

Contributor Pro has the following hardware requirements:

- Windows-based PC (Minimum: 1 GHz processor, 500 GB HDD, 1 GB RAM)

Resolved Issues

Release 6.0 SP3 (build 6.0.74.0) July 29, 2013	
Issue #	Description
49518447	Colligo Email Manager was causing a conflict on the shutdown of Outlook 2007 with Live Meeting 2007. This has now been resolved.
49563179	After the migration process, the Search locations and Favorite locations that have been migrated successfully are now displayed.
49692015	Previously, Colligo Email Manager detected the availability of SharePoint sites based on exchange connectivity. Now, it checks the connectivity of each SharePoint site individually. For more information on this registry setting/MSI property, see the link below. Note: the default timeout is set to 5 seconds. Colligo does not recommend changing this. http://www.colligo.com/support/setting/detecting-connectivity/
50093253	In Colligo Email Manager, users can now use “-“ and “+“ and “ “ as literal search terms. These are no longer treated as search operators.
50902801	The following changes have been made to the behavior of both Colligo Briefcase and Colligo Email Manager: <ul style="list-style-type: none"> • On discarding a check out, instead of reverting back to the previous version number, Contributor Pro waits for the next synchronization before reverting. • Uploading a duplicate file no longer results in the sync dropping. If the overwrite confirmation is given, the file successfully syncs to SharePoint. • During a sync, when a remote change in SharePoint necessitates a move of a file in the local file system due to an unresolved conflict, invalid filename, or file system access issues, the file is no longer disconnected from future syncs.
50919139	When connecting to a SP site via a relative URL redirect (eg. connecting from a home network through a proxy, and the URL provided to the user is relative to the proxy), Colligo Briefcase and Colligo Email Manager crashed. This has been resolved.
50919291	When uploading an item to SharePoint 2010 or 2013, the value entered in a field named Keyword is now applied to the field on the SharePoint site.
52505585	A document can no longer have a content type set to Folder; a Folder can no longer have its content type set to document. These rules apply to parent-inherited content types; eg. document sets and folders, and documents and document-derived content types.

Resolved Issues

Release 6.0 SP2 (build 6.0.68.0) June 13, 2013	
Issue #	Description
45994507	Previously, users were able to create folders inside a document set from within Colligo Briefcase. This functionality is now disabled.
47125323	When inputting metadata values for Hyperlink and Picture fields in the Colligo Email Manager Edit Properties screen, the values were not retained when moving from one file to the other and back again. This issue has been resolved and values entered for those fields are now retained.
47143867	In the Colligo Email Manager Edit Properties screen, if more than 2 fields had drop-down menus with multiple options to choose from with no assigned default value, the user saw the following value error in the field: 'Colligo.Runtime.Classes.ChoiceItem.' This issue has been resolved.
47493681	If a user used the Connect to Email Manager button to connect a SharePoint site to Colligo Email Manager, the tool did not shut down and was left running in the background. This issue has been resolved.
47550469	In Colligo Email Manager, if a user expanded a site to drill down to a subsite, all other configured SharePoint sites that were expanded collapsed. This issue has been resolved.
47646683	If a subsite with white space in the name was added, it could not be removed in Colligo Email Manager Offline mode. This issue has been resolved.
47647097	If the Connect to Email Manager button was used to add a Favorite or Folder under a subsite with whitespace in the name, the Favorite or Folder was not added successfully. This issue has been resolved.
47936149	If a user added a Colligo Email Manager Favorite or Folder through the Connect to Email Manager button in Internet Explorer when the location is a root site, the resolved site in Email Manager pointed to the specific location rather than the parent site itself. This issue has been resolved.
48419997	In the multi-item metadata editor in Colligo Email Manager, users can 'select none' by holding down control on the metadata editor. This created an error when users then tried to enter values in the fields. This issue has been resolved.
48688555	For deployments that utilized re-branding, the CONTRIBUTOR_SHORTCUT_NAME branding key did not apply to the Start Menu item. This has been resolved and any text entered as the value for this key now displays in the Start Menu.
48741573	For deployments that used Colligo Administrator to push Favorites to Colligo Email Manager in Connected Mode, any items filed to the location were not uploaded. This issue has been resolved.

48777833	In Briefcase for Windows, IT administrators did not have the ability to change the storage location. Administrators now have the ability to change this to their preferred location. NOTE: it is necessary to restart the system for the Windows Explorer integration to properly take effect.
48778267	The Configuration dialog in Colligo Email Manager previously used Exchange availability to determine if a user could connect to SharePoint or not. This has now been changed to check the actual connection to SharePoint.
48779151	If users were upgrading from Contributor 4.x or Email Manager 5.x to Contributor 6.0, search locations were not detected and included in the migration process. This has been resolved and search locations are now included as part of the upgrade/migration process.
48922853	When users tried to file an email that had a Tab character in the subject line, the Colligo Email Manager Edit Properties screen displayed as blank. This issue has been resolved.
49169907	When a user tried to open an item from the search results list in Colligo Email Manager using either a double-click or a right-click > Open action, the file did not open. This issue has been resolved.
49549449	When a user selected multiple items in the Edit Properties screen and clicked on a text field but did not enter any text, any information previously saved in the field was lost. This issue has been resolved.
49690239	When a site was added to Colligo Email Manager from Colligo Administrator, the site was not added as a Search Location. This issue has been resolved.
50487095	If Colligo Email Manager settings were controlled by Colligo Administrator but a user did not have connection to it, the application prompted the user to enter credentials on the start-up of Outlook. The authentication pop-up no longer displays when the user cannot connect to Colligo Administrator.
50549257	In Colligo Contributor Pro, the HiddenMetadataFields registry entry did not work. This issue has been resolved.
50551245	When adding multiple sites at once in Colligo Email Manager, there are missing icons beside the site names. This issue has been resolved.
50903133	In Colligo Email Manager, if a user opened an item in the search results list that was not fully downloaded, the action failed. This issue has been resolved.
50919033	The Colligo Briefcase and Colligo Email Manager Sync Panel are now minimized to the task tray on Windows startup.
51245475	Colligo Email Manager Connected Mode no longer fails when uploading files to a SharePoint location that contains a Managed Metadata field with a default value and is hidden by the HiddenMetadataFields setting.
51255035	Colligo Email Manager and Colligo Briefcase for Windows now correctly interpret SharePoint Office 365 sites that were configured subsequent to Microsoft updates to their SharePoint Office 365 servers.
51527907	Business Connectivity Services (BCS) fields now display in the Edit Properties screen in Colligo Email Manager Connected Mode.

Resolved Issues

Release 6.0 SP1 (build 6.0.56.0) May 3, 2013	
Issue #	Description
49148081	There was an error with IE site connect in Email Manager Offline mode. This issue has been resolved.

New Features

Release 6.0 SP1 (build 6.0.54.0) May 2, 2013	
Reference #	Description
43089731	When users have no connectivity, the search feature in Email Manager displays an error message.
48005881	Email Manager can now connect through ADFS to use Colligo Administrator.
48006541	By default, the ability to select multiple items in the metadata editor is enabled. To disable this setting, see: http://www.colligo.com/support/setting/disable-multi-select-feature-in-metadata-editor
48007145	Email Manager now supports Office 365 authentication re-directs to a local ADFS server. Users must specify their own Office 365 credentials when adding an Office 365 site.
48008861	Email Manager now supports Administrator in all Colligo-supported authentication modes. See here for a list of supported authentication schemes: http://www.colligo.com/support/kb/what-sharepoint-authentication-methods-are-supported/
48180349	Briefcase for Windows can now exceed the List View Threshold and List View Lookup Threshold simultaneously. This setting is off by default. To enable this setting, see: http://www.colligo.com/support/setting/enable-list-view-threshold-override

Resolved Issues

Issue #	Description
41682131	Briefcase for Windows did not respect environment variables (eg. [username]) for the Storage Root registry value. This issue has been resolved.
42655003	The Configuration dialog in Email Manager had out-of-date tooltips when the status of a location changed from not synchronized to either Upload Only or Offline. This has been resolved.
43975981	An issue where Managed Metadata terms contained a trailing semi-colon (;) on Managed Metadata Terms when viewing metadata has been resolved.
43977281	Previously, if the Send-And-File feature in Email Manager was used, metadata was not applied if the Subject field of the email was blank. This has been resolved. This is a resolution of a previously documented Known Issue 43977281.
45366939	Previously, if users altered the maximum number of Favorites and History items in

	Email Manager, the changes would not persist after Outlook was restarted. This has been resolved.
46317455	Occasionally, Managed Metadata defaults set at the folder level in SharePoint would not apply to uploaded items. This has been resolved. This is a resolution of a previously documented Known Issue 46317455.
46747625	During the migration process from Email Manager 5.5 to Email Manager 6.0, the ADFS Registry configuration was not being migrated. This has been resolved.
47024411	If a user used the Connect to Email Manager button to add an Email Manager Folder that pointed to the same SharePoint location as an existing Folder, an error occurred. This has been resolved.
47065019	In the Email Manager Offline view, there were multiple occurrences of the New , Upload , and Filter menus. This has been resolved. This is a resolution of a previously documented Known Issue 47065019.
48210983	In some cases, an error occurred when dragging-and-dropping items directly from the Recovered Items folder into an Email Manager Favorite or Folder location. This has been resolved.
48211331	In some instances, in Email Manager users could not file emails with embedded images. This has been resolved.
48271013	Office 365 sites that contained redirects could not be added to Email Manager even when the site was accessible through Internet Explorer. This has been resolved.
48431151	Any fields that were hidden in SharePoint were not hidden in Contributor Pro. This has been resolved.
48761821	If there were spaces before or after the license key when users entered it in the installer, it was considered an invalid key. This has been resolved. NOTE: trailing or leading white space in the MSI property will still result in the key being read as invalid. This resolution is specific to the guided installer.
49094291	In certain situations, when Email Manager was installed in Offline Mode, users were unable to upload files. This has now been resolved.

New Features

Release 6.0 (build 6.0.44.0) April 15, 2013	
Reference #	Description
0000001	<i>Email Manager Offline Mode</i> now supports viewing and filing SharePoint content and email while offline.
0000002	New icons (upload-only folder vs. offline folder) now display to represent the respective states of the SharePoint locations.
0000003	The two products that are bundled together to form Contributor Pro share a single SharePoint configuration setting.
0000004	<i>Email Manager</i> and <i>Briefcase for Windows</i> now have the same Metadata support.
0000005	Authentication types supported now include Windows (default and non-default), Windows mixed mode (form-based and Windows default and non-default), Form-based, Office 365, and ADFS2.0

Known Issues

Issue #	Description
0000006	German, French and Spanish language are currently not supported
0000007	SharePoint 2007 is currently not supported in <i>Email Manager Connected Mode</i> .
0000008	There is no ability to change the storage location in <i>Briefcase for Windows</i> .
0000009	IE site connect only supports SharePoint sites with default Windows credentials in <i>Email Manager Offline Mode</i> .
0000010	There is no ability to add a term to a managed metadata set in <i>Email Manager Offline Mode</i> .
0000011	Adding an attachment from SharePoint when sending an email is only supported when users have a network connection in <i>Email Manager</i> .
0000005	There is no ability to filter folders when a user navigates the SharePoint hierarchy in <i>Email Manager Offline Mode</i> .
46317455	The ability to apply default metadata at the folder level is not supported in <i>Email Manager Offline Mode</i> .
46317455	The ability to prompt the metadata editor at the folder level is not supported in <i>Email Manager Offline Mode</i> .
43977281	If an email with a blank subject line is sent using the Send and file feature, metadata will not be applied in <i>Email Manager Offline Mode</i> .
47065019	The top menu bar in the offline SharePoint view displays multiple times in <i>Email Manager Offline Mode</i> .
47936149	When using IESiteConnect for Office365 in <i>Email Manager Connected Mode</i> , a library may be added as a site.
