WHITE LABELING

Colligo Contributor includes the ability for customers to replace any instances of Colligo branding with their own company name and information. This document describes the fields and locations in Colligo Contributor where you can modify that information, and provides a script with the keys that you can add to your registry.

REGISTRY PATH AND LICENSE KEY

All registry keys for Colligo Contributor are located at the following file path:
HKCU\Software\Colligo\Contributor.

NOTE: For 32 bit OS, the key location is:

HKEY_LOCAL_MACHINE\SOFTWARE\ColligoOfflineClient\UserInterface\Branding

Enabling Branding

To enable branding, you need a branding-enabled license key, which you can purchase from Colligo.

You have two options to modify the branding locations in the product:

- Add the branding settings to the MSI file and deploy the file to all users: see **Using the MSI**
- Update your users' registries with the branding registry keys: see **Using Registry Settings**

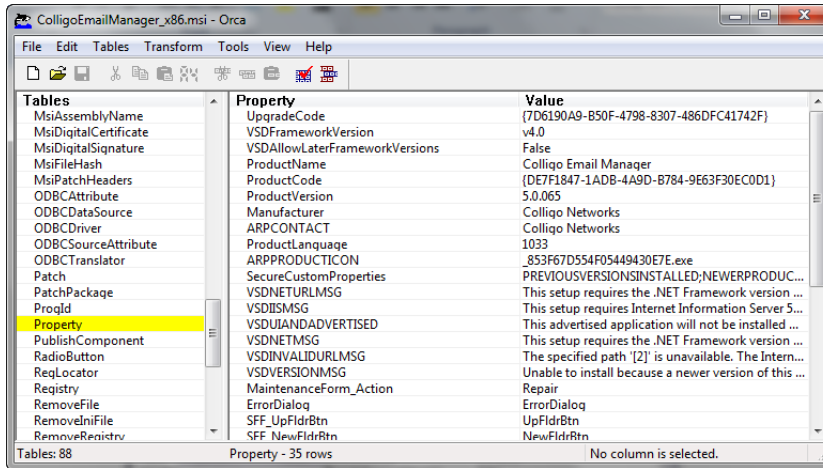

Disabling Branding

To disable branding you can install a license key that doesn't include branding capability, or you can set the registry key **EnableBranding** to **0**. However, there are 4 properties that you cannot set in the registry, so those properties would not change.

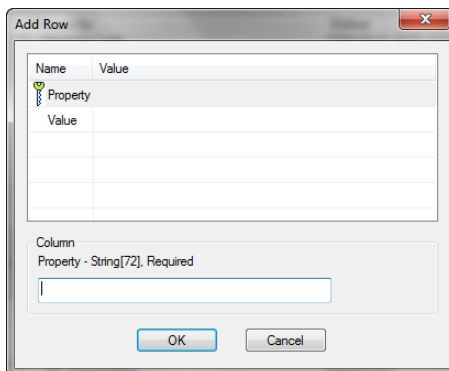

USING THE MSI

To update the MSI file:

1. Download and install Orca, a Microsoft MSI editor, from the following location:
<http://support.colligo.com/Lists/Knowledge%20Base/DispForm.aspx?ID=4>
2. Open the MSI file in Orca.
3. Navigate to the **Property** table in the **Tables** list.

4. From the **Tables** menu, select **Add Row**.
The **Add Row** dialog displays:

5. Enter the **Property** name and **Value**.
6. Click **OK**.
The new property displays in the Property Table.
7. Using this approach, add all the relevant properties listed in **Branding Properties & Locations**.

USING REGISTRY SETTINGS

The following text is the registry script for the branding locations.

```
Windows Registry Editor Version 5.00

[HKEY_LOCAL_MACHINE\SOFTWARE\Wow6432Node\ColligoOfflineClient\UserInter
face\Branding]
"EnableBranding"="1"
"AboutScreenFileName"="About.jpg"
"AboutScreenInfoLocation"="300,30"
"SplashScreenFileName"="SplashScreen.jpg"
"SplashScreenInfoLocation"="330,250"
"OutlookRibbonTabName"="Colligo Branding Tab"
"OutlookAboutButtonName"="Colligo Branding"
"OutlookAboutButtonTooltip"="About Colligo Branding"
"OutlookHelpButtonName"="Colligo Branding App Help"
"OutlookRibbonGroupName"="Colligo Branding Group"
"OutlookHomeTabGroupName"="Colligo Branding for SharePoint"
"OutlookSendAndFileGroupName"="Colligo Branding Send & File"
"OutlookAttachmentsGroupName"="Colligo Branding Attachments"
"OutlookSendAndFileDialogName"="Colligo Branding Send & File"
"OutlookSendAndFileDestinationName"="Select a Colligo Branding Folder"
"AttachmentManagerCaption"="Colligo Branding Attachment Manager"
"SystemTrayAppName"="Colligo Branding App Name"

[HKEY_LOCAL_MACHINE\SOFTWARE\Wow6432Node\ColligoOfflineClient\Outlook]
"RootFolderName"="Colligo Branding Test"
```

These keys are not present by default in the registry.

To add them:

1. Copy and paste the script into Notepad.
2. Save the file as **.reg**.
3. Double-click the file to open it and add to the registry.
4. Enter your company name or the preferred wording in the second half of each key.

NOTE: The following 4 properties can only be modified in the MSI file:

- FILE_MANAGER_FOLDER_NAME
- START_MENU_FOLDER
- CONTRIBUTOR_SHORTCUT_NAME
- CONFIGURATION_EDITOR_SHORTCUT_NAME

BRANDING PROPERTIES & LOCATIONS

The following table describes the property names and registry keys for the different instances of branding throughout Contributor.

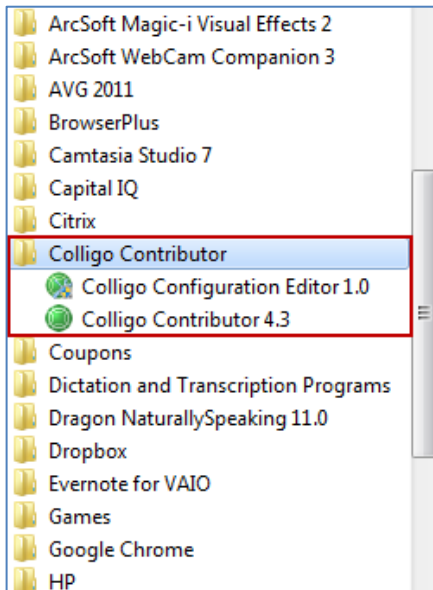

MSI Property Name	Registry Key	Default Value	Format
FILE_MANAGER_FOLDER_NAME	n/a	(empty)	Text
START_MENU_FOLDER	n/a	(empty)	Text
CONTRIBUTOR_SHORTCUT_NAME	n/a	(empty)	Text
CONFIGURATION_EDITOR_SHORTCUT_NAME	n/a	(empty)	Text
ENABLE_BRANDING	UserInterface\Branding\EnableBranding	"1" = enabled	0 or 1
ABOUT_SCREEN_FILENAME	UserInterface\Branding\AboutScreenFileName	(empty)	Text
ABOUT_SCREEN_INFO_LOCATION	UserInterface\Branding\AboutScreenInfoLocation	(empty)	x-pixel,y-pixel ("100,200")
SPLASH_SCREEN_FILENAME	UserInterface\Branding\SplashScreenFileName	(empty)	Text
SPLASH_SCREEN_INFO_LOCATION	UserInterface\Branding\SplashScreenInfoLocation	(empty)	x-pixel,y-pixel ("100,200")
OUTLOOK_RIBBON_TAB_NAME	UserInterface\Branding\OutlookRibbonTabName	(empty)	Text
OUTLOOK_ABOUT_BUTTON_NAME	UserInterface\Branding\OutlookAboutButtonName	(empty)	Text
OUTLOOK_HELP_BUTTON_NAME	UserInterface\Branding\OutlookHelpButtonName	(empty)	Text
OUTLOOK_RIBBON_GROUP_NAME	UserInterface\Branding\OutlookRibbonGroupName	(empty)	Text
OUTLOOK_HOME_TAB_GROUP_NAME	UserInterface\Branding\OutlookHomeTabGroupName	(empty)	Text
OUTLOOK_COLLIGO_GROUP_NAME	UserInterface\Branding\OutlookColligoGroupName	(empty)	Text
OUTLOOK_SENDANDFILE_GROUP_NAME	UserInterface\Branding\OutlookSendAndFileGroupName	(empty)	Text
OUTLOOK_ATTACHMENTS_GROUP_NAME	UserInterface\Branding\OutlookAttachmentsGroupName	(empty)	Text
OUTLOOK_SENDANDFILE_DIALOG_NAME	UserInterface\Branding\OutlookSendAndFileDialogName	(empty)	Text
OUTLOOK_SENDANDFILE_DESTINATION_NAME	UserInterface\Branding\OutlookSendAndFileDestinationName	(empty)	Text
OUTLOOK_ATTACHMENTMANAGER_CAPTION	UserInterface\Branding\AttachmentManagerCaption	(empty)	Text
SYSTEM_TRAY_APP_NAME	UserInterface\Branding\SystemTrayAppName	(empty)	Text

NOTE: The Outlook root folder name property (ROOT_FOLDER_NAME) is configurable without a branding license key.

Start Menu

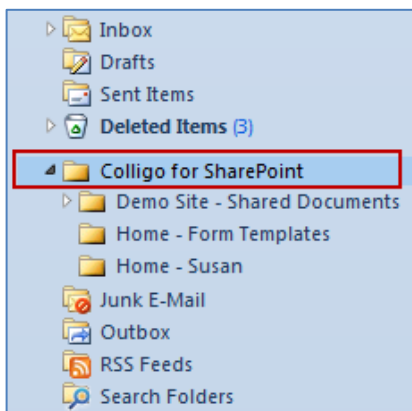

The following MSI properties display in the following locations:

- START_MENU_FOLDER
- CONTRIBUTOR_SHORTCUT_NAME
- CONFIGURATION_EDITOR_SHORTCUT_NAME

Root Folder Name

The registry key *RootFolderName* displays in the following location:

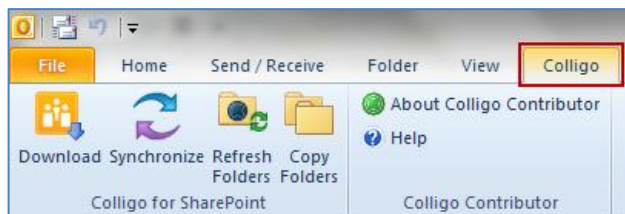

NOTE: The *RootFolderName* is part of a pre-existing registry key:

HKEY_LOCAL_MACHINE\SOFTWARE\Wow6432Node\ColligoOfflineClient\Outlook

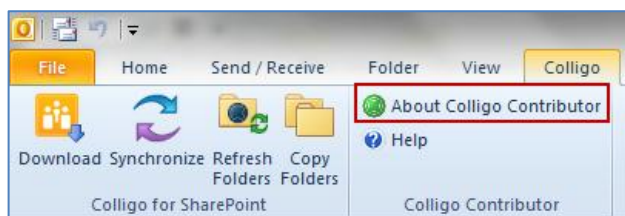

Ribbon Tab Name

The registry key *OutlookRibbonTabName* displays in the following location:

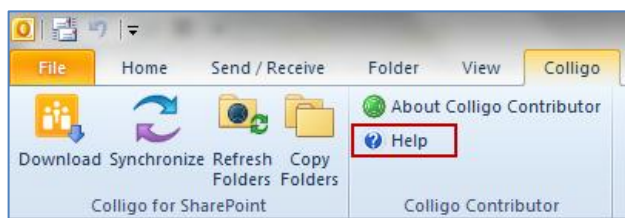

About Button

The registry key *OutlookAboutButtonName* displays in the following location:

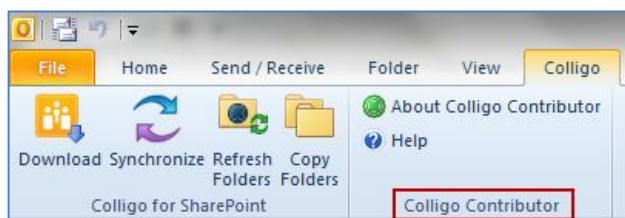

Help Button

The registry key *OutlookHelpButtonName* displays in the following location:

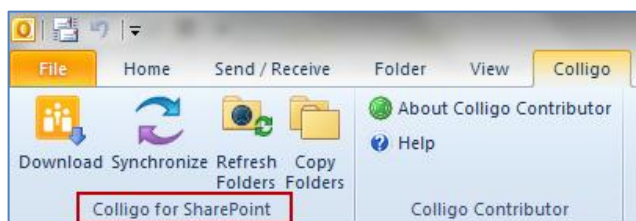

Group Name

The registry key *OutlookColligoGroupName* displays in the following location:

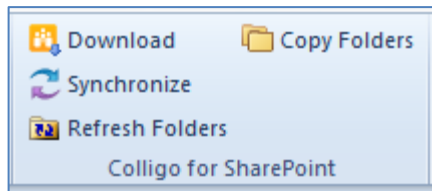

Ribbon Group Name

The registry key *OutlookRibbonGroupName* displays in the following location:

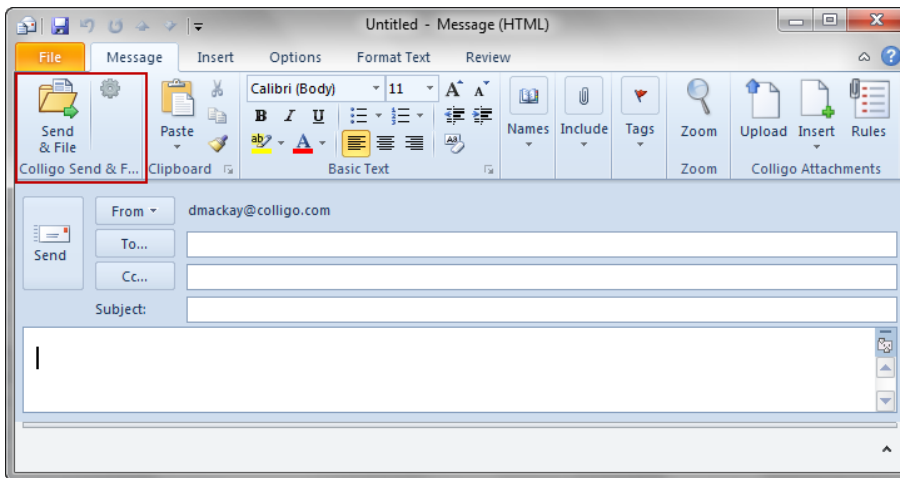

Tab Group Name

The registry key *OutlookHomeTabGroupName* displays in the following location:

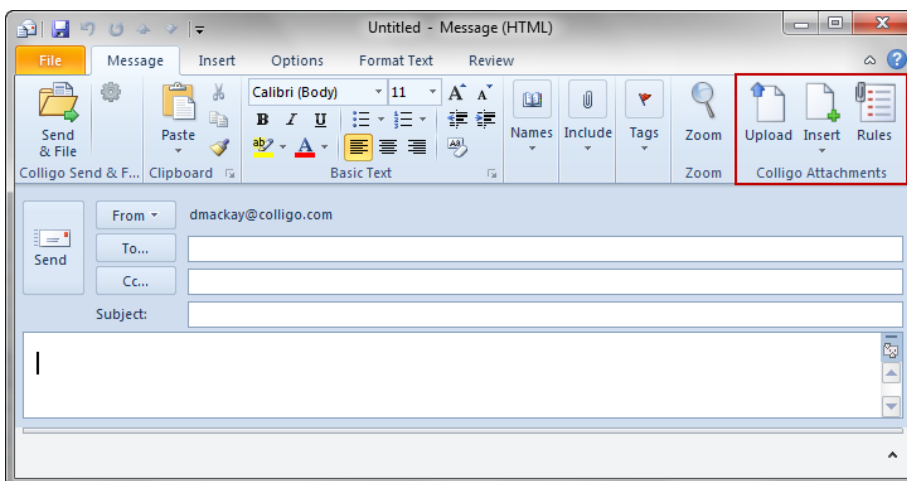

Send & File Group

The registry key *OutlookSendAndFileGroupName* displays in the following location:

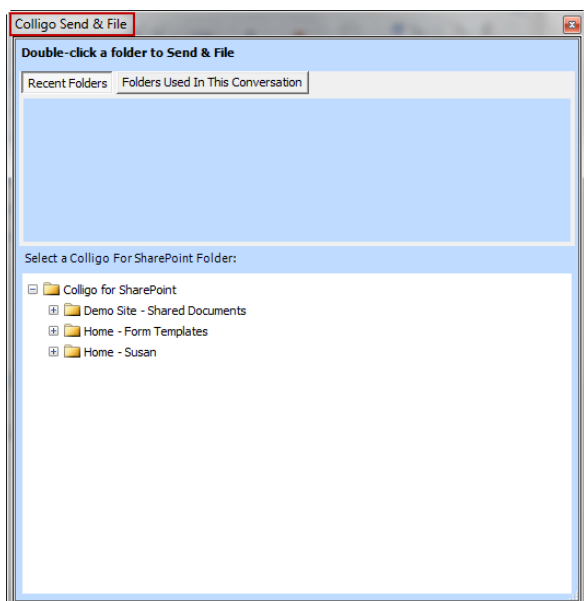

Attachment Group

The registry key *OutlookAttachmentsGroupName* displays in the following location:

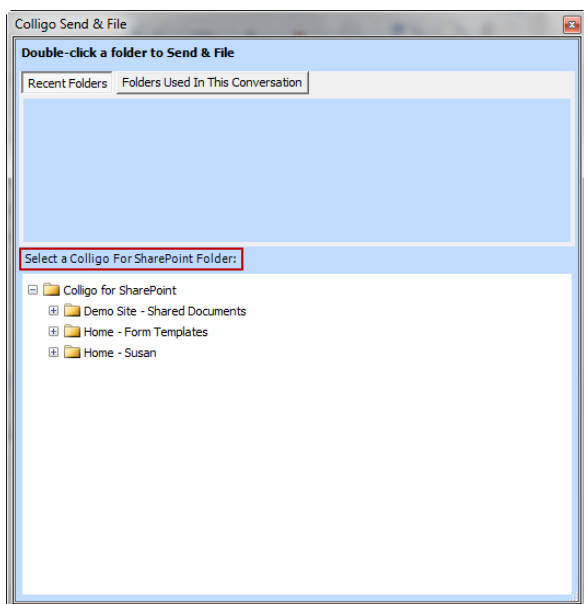

Send & File Dialog

The registry key *OutlookSendAndFileDialogName* displays in the following location:

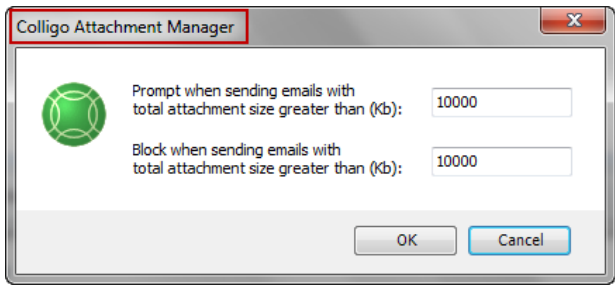

Send & File Destination

The registry key *OutlookSendAndFileDestinationName* displays in the following location:

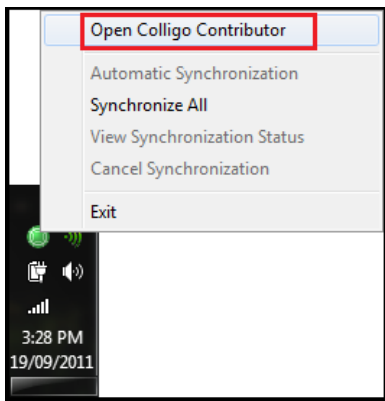

Attachment Settings

The registry key *AttachmentManagerCaption* displays in the following location:

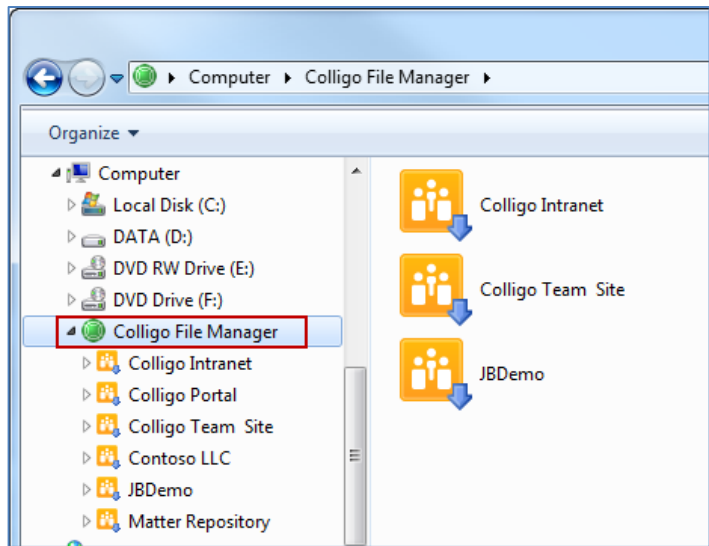

System Tray

The registry key *SystemTrayAppName* displays in the following location:

File Manager Root Folder

The MSI property *FILE_MANAGER_FOLDER_NAME* displays in the following location:

About Screen and Splash Screen Images and Locations

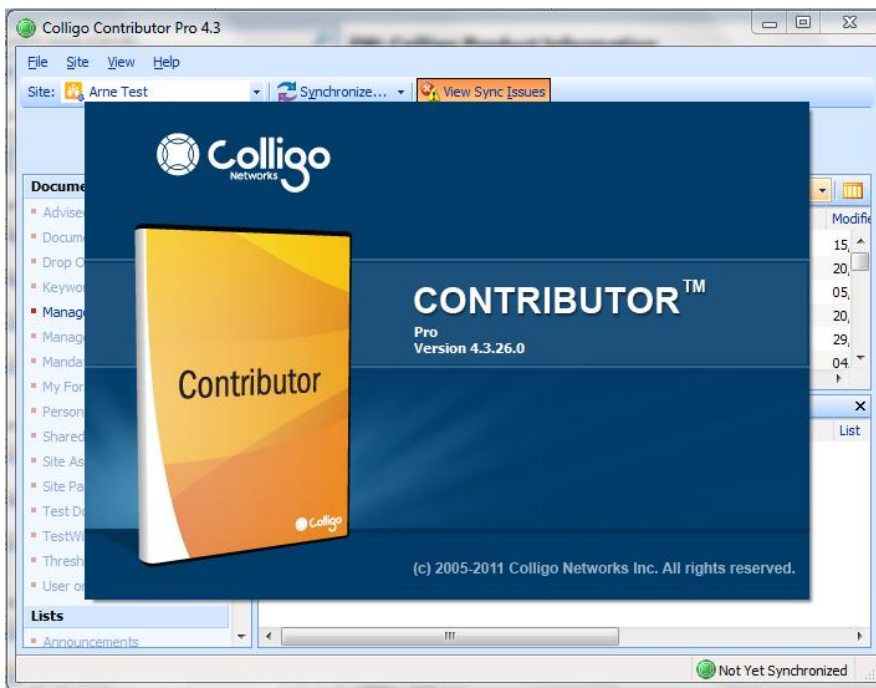

The *AboutScreenFileName* and *SplashScreenFileName* registry settings point to a new About or Splash screen image. You can give the image names absolute paths, or by default, Contributor looks for the images in one of the following locations:

- %LOCALAPPDATA%\ColligoOfflineClient\Config\Branding
- %APPDATA%\ColligoOfflineClient\Config\Branding
- %ALLUSERSPROFILE%\ColligoOfflineClient\Config\Branding

The *AboutScreenInfoLocation* and *SplashScreenInfoLocation* registry settings refer to the location of the version and build number on the About and Splash Screens.

About Screen Image

The registry keys *AboutScreenFileName* and *AboutScreenInfoLocation* display in the following locations:

Splash Screen Image

The registry keys *SplashScreenLocation* and *SplashScreenInfoLocation* display when you first launch Contributor.
